PT. Garasilabs Manivesta is a software development company specializing in creating and building innovative and user-centric web and mobile applications. We help business to leverage on using custom applications to achieve Digital Transformation by helping to streamline processes, enhance customer engagement and improve overall business productivity and profits. Our team consists of experienced developers, designers and devops. We will work hard for you and with you to deliver high quality solutions for your challenging business needs.

## Vision

Bringing affordable but very innovative solutions to help businesses to reach the next level of efficiency, profitability and success.

## Mission

In building our app, we are committed to find innovative solutions with the following principle in mind.

- Our solution should help to reduce complexities. A less complex system will always yield faster decision making, hence speed and overall better results
- Our solution should not be afraid to break rank by coming up with totally unorthodox methods in solving difficult problems
- Our solution should improve quality of business for our clients by improving their services, processes and bottom lines

## Why us

We are fast learning team, able to adapt to our client development needs. We especially are strong in the following area

- Web development

- Mobile development

- Backend technology

- Server technology

- Cloud technology

- Analytics technology

- AI technology

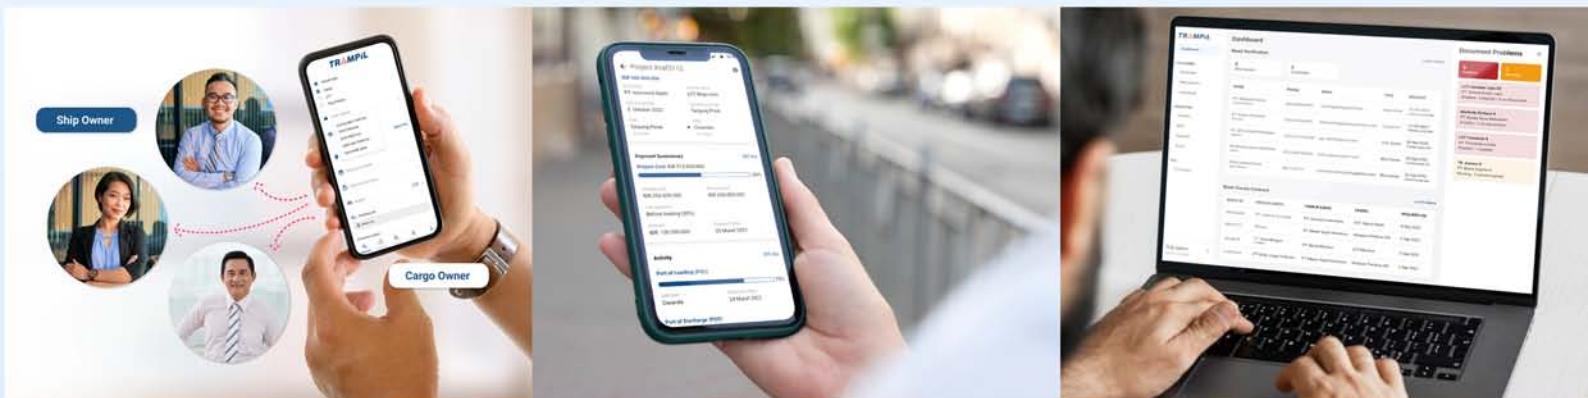

# Our Projects

## Atendi

Powerful but easy to use Human Resource app

- Web, Android and iOS app
- Attendance tracking for check-in, check-out and customer visits
- Human resource management features such as an employee information system, leaves, and payroll
- Form builder for flexible data taking needs or form submissions
- Integrate with any web application
- Content management system to foster strong and effective information distribution within a company
- Supports modern workforce such as work-from-home, digital nomads, flexi working hours

## Trampil App

Innovative ship booking application specializing in cargo, ltc, tug and barge.

- Web and Native Android solution
- Complex and innovative business processes
- Complex UI requires high degree of good UX
- Leveraging on Geographic Information System database to compute and predict ship location and arrivals with zoning information

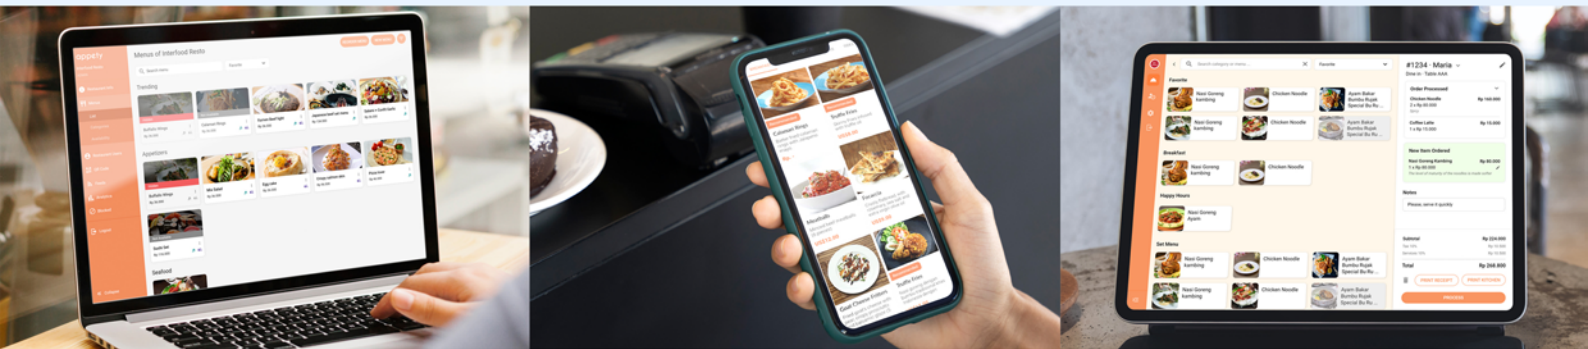

# Our Projects

## Timetrack

Large scale human resource app that has achieved the following characteristics

- 20,000+ check-ins and check-outs on daily basis with thousands of concurrent operation during peak hours
- 20,000+ monthly payslip deliveries that save our client very substantial operational cost
- More than 30 million rows of database record
- Highly optimized code and PostgreSQL fine-tuned configuration to deliver a lightning speed performance
- Utilizing Time Series database with complex but highly optimized configuration for time sensitive data
- Span multiple databases including PostgreSQL, MongoDB and Redis with various micro services with Docker

## Appety App Suite

Innovative restaurant app suite that includes Point of Sale system (POS), Electronic Menu (e-Menu), Waiter App and its administrative backend.

- Digital Transformation app that transform how restaurant or cafe is run. Deliver maximum service with much less personnel.
- Tablet-based or POS machine running Android
- Innovative Waiter App to provide best customer service
- Electronic Menu for fast and efficient ordering
- Very complex app but we strived and successfully delivered powerful yet simple app suites
